For over 25 years, we have been operating sea and land carrier solutions for perishable cargo in Latin America and the United States.

Now, at NWS, we want to share our know-how and bring a fresh, agile, and people-oriented new approach to logistics to the people who need it the most. **Come what may.**

Our smart routes go from Guatemala, Costa Rica, Peru and Ecuador to the United States, and back.

THE BOTTLENOSE ROUTE

- Santo Tomás de Castilla
- Port of Galveston

We at NWS try hard not to get in the way of sea life. To create awareness, we named each of our routes like different sea-protected species.

Our Bottlenose route was based on the Bottlenose Dolphins. A name that comes from their short, thick snout. They are usually found in tropical or warm waters around the globe. They are threatened by commercial fishing for other species like tuna and can become entangled in nets and other fishing equipment.

Schedules:

Origin	Destination	Transit Time (days)*
Moin	Santo Tomás	2
Santo Tomás	Port Galveston	3
Port Galveston	Santo Tomás	3

Origin	Destination	Transit Time (days)*
** Moin	Port Galveston	7

* These are estimated transit times subject to changes.
 ** Transhipment through Santo Tomas, GT

Dry Cargo (FAK)

Reefer Cargo

Project Cargo

With us, you also get:

- ✓ A NWS Expert always available
- ✓ Ocean + Inland integrated solution if required
